

Mr. Fish: Cartooning From The Deep End

Description

Posted by Larry Gleeson

Mr. Fish is a cartoonist who's found career success creating compelling, and often, adult themed editorial cartoons. But now, editors once willing to back his controversial work are disappearing as fast as the newspapers which once employed him. With a family to raise, but a unique defiant voice, Mr. Fish struggles to stay true to his creativity in a world where biting satiric humor has an ever-diminishing commercial value.
