When independent Internet technicians discovered a chillingly powerful computer virus unlike anything theyâ??d seen before, signs pointed not merely to recreational or criminal hackers, but to a high-stakes game of cyber warfare between nations. Academy AwardÂ®-winning filmmaker Alex Gibney returns to the festival with ZERO DAYS, a fascinating exposÃ© of American and Israeli covert operations aimed at Iranâ??s nuclear program. Gibney (TAXI TO THE DARK SIDE, GOING CLEAR: SCIENTOLOGY AND THE PRISON OF BELIEF) is a master of investigative documentary filmmaking, shining a light on institutions as diverse as WikiLeaks, the Church of Scientology, Apple Inc., Enron and the U.S. military. His latest work poses compelling and critically important questions about the role of technology in war and foreign policy, and its worldwide implications. â?? Mimi Brody
