

Sundance Institute Announces Shorts For 2017 Sundance Film Festival

Description

Park City, UT — Sixty-eight short films, announced today, will complement the lineup of longer fare at the **2017 Sundance Film Festival**. The short film slate aligns thematically with other Festival categories, including Midnight and The New Climate, the Festival's new programming strand highlighting climate change and the environment. The Festival hosts screenings in Park City, Salt Lake City and at Sundance Mountain Resort January 19-29.

The Institute's support for short films extends internationally and year-round. Select Festival short films are presented as a traveling program at over 50 theaters in the U.S. and Canada each year, and short films and filmmakers take part in regional Master Classes geared towards supporting emerging shorts-makers in several cities. Sundance Institute's Documentary Film Program, supported by the John D. and Catherine T. MacArthur Foundation and in partnership with *The Guardian* and *The New York Times'* Op-Docs, provides grants to makers of documentary shorts around the world, including new filmmakers in Cuba featured in a Special Event program at this year's Festival.

Mike Plante, Senior Programmer for the Sundance Film Festival, said, "Each year we see more short films from around the country and from more regions around the world, which is exciting as we want to discover new voices to support. This year's crop captures the full spectrum of what short films can be: emotional, hilarious, horrifying and touching — sometimes all at once."

Among the shorts the Festival has shown in recent years are *World of Tomorrow*, *Thunder Road*, *Whiplash*, *The Tsunami* and *the Cherry Blossom*, *Gregory Go Boom* and *Edmond*.

The Short Film program is presented by YouTube.
